Re: Online Reverse Auction for Chemicals

Each year the wastewater plant uses Sodium Hypochlorite and Sodium Bisulfite for the disinfection of treated water before it is discharged to the Wabash River.

In 2009 the City of West Lafayette benefited from a joint online reverse auction for chemicals with the City of Lafayette.

I am requesting approval to participate in this same process with the City of Lafayette for our 2010 chemical needs.

With your approval the online auction will be held in the Council Chambers of Lafayette City Hall at 1:30pm (EST) on Wednesday, February 11, 2010 . The Board of Public Works and Safety will reserve the right to accept or reject any and all bids.
